English Professional Proficiency

Tamil Full Proficiency

Kannada Full Proficiency

PROFILE

As a versatile full stack web developer, I specialize in creating efficient and scalable applications that meet diverse user needs. My technical expertise covers both frontend and backend development, ensuring seamless integration and functionality across platforms. I thrive in dynamic environments, whether contributing independently or collaborating with a team to achieve shared goals.

INTERNSHIP

CodeClause

1 month

- Completed a web development internship at Code Clause, gaining hands-on experience in both frontend and full stack development.
- Successfully built user-centric interfaces and robust, scalable applications as part of assigned tasks.
- Adaptable and effective in both independent and team-based projects, consistently delivering high-quality results.
- Strong foundation in full stack web development, with a focus on creating seamless and efficient solutions

AWARDS

Smart India Hackathon

26-Aug-2022

- Winner of Smart India Hackathon 2022 organized by the Ministry of Rural Development.
- Successfully implemented an innovative rural development project, demonstrating problem-solving and technical skills.
- Contributed to impactful solutions aimed at improving rural communities.
- Gained recognition for excellence in project execution and collaboration during the national-level competition.

PROJECTS

Blog Website

- Developed a fully functional blog website with user-friendly design and seamless navigation.
- Integrated features like content management, comment sections, and responsive layouts to enhance user engagement and accessibility.
